Teacher notes

- For Battleship, keep partners' grids private with a book or folder between them.
- Learners must say both a food word and a coordinate before a partner answers hit or miss.
- Use a button, coin, or small eraser as a Bullseye token.
- The printable pack works without a Classendo account.

Optional: take the same six cards online

Classendo Flashcards lets visitors choose up to six temporary cards, then open the same cards in Classroom Mode. The printable pack remains complete without this step.
